Enter the serial number of the key and press the "Generate" button. Enter the password of the key and press the "Generate" button. Note: 1. Before to use this keygen, the serial number should be registered and validated from the website Autodesk Autocad.com. 2. This keygen support for 1 product. I think the License should be valid. But when I install it the License doesn't change. I tried to change it to the licence code which Autocad free version but it didn't change. I tried to make the license type of my key and it doesn't change. Then I use the trial version of Autocad and then installed Autocad. But it's impossible to register. So I can't validate my key. Please help me how to install it or how to valid my license. My environment: Windows 7 Ultimate 32bit, 64bit. My Autocad version: 4.0 My Autocad for Mac 64bit version: 1.3 A: Looks like the keygen generator doesn't work on the for Mac OS and it fails with the following error: @ Error generating license key (error code 17) That's because they changed the license validation algorithm for the Mac version. I don't have the Mac version but I checked with a friend who has and it seems that the keygen in for Mac version will not work. If you have a Windows version you can try to install it to validate your key. If you don't have the Windows version you can't try the keygen generator. For the Mac version you can use this post as a workaround: MAC_OSX [Registry] Then run the install.exe without opening it.
