## Fifa 22 [Win/Mac] (2022)

# [Download Setup + Crack](#)

The player-data and AI engine of FIFA 17 has been rebuilt and reengineered to deliver "smarter" decision-making, realism and connection. The result is a more authentic sport simulation that blends the speed and athleticism of a dynamic football match with FIFA's greatest footballers. Improved Control New and refined controls, both on and off the pitch, have been incorporated into FIFA's new control scheme. New "Quick Shots" feature When you are in possession of the ball, you can "Quick Shoot," instead of playing the ball, you can press both "shoot" and "quick shot" buttons to instantly fire off a powerful shot from anywhere on the pitch. Alternatively, you can press "shoot" to shoot at goal or pass the ball into the "smart" goalkeeper. The "Quick Shot" doesn't replace your normal shot, it is an advanced shot that gives you a more accurate first touch when shooting and passing on and off the ball. Revised "Smart Defending" When you are being attacked by an opponent, your defending "Smart Defending" feature will make the game change to your advantage. This feature shows various reactions by the defender depending on his position on the pitch. For example, if you are defending an attacker in the middle of the pitch, you will see a defender "betray" the ball from a standing position, while in the defender's "feet" position, the defender will be in a "man down" position and will only try to defend a ball that is just about to cross his feet and in his feet position, the defender will use his "feet" to dig the ball out from the attacker. New "Active" Awareness If the player leaves the pitch and returns later, the player's controller settings and "player attributes" will be saved. This means that the player will automatically return to the last visual appearance when you press the same button. Players who have "Smart Defending" feature enabled will even trigger their "Smart Defending" reaction automatically. New Visual Details FIFA's brand-new visual details help players experience a more realistic football pitch. FIFA's brand-new visual details help players experience a more realistic football
