-key has 2 inputs, one for key on or off, one for the volume. The volume changes depending on the key, but the settings are constant -key macro change without taking track -if the key is off, the wheel changes volume, if it is on, the wheel changes repeat The function is to generate the next note on the track with the current note. The range for the track is 0-8. As the actual value is the key, the range for the key is 0-64. And you can modify the track with the press of a key. For example, if a piano key is set to D and the current track is in the 4th position, the next track will be generated by a C# chord. If you are in the position 5 of the current track, the keyboard function will generate a C# chord.
